Minister in charge: The Hon'ble Sir S. N. Banarji, Kt.

No. 2822 P.H.—The 14th November 1922.—The following draft of rules, which, in exercise of the power conferred by section 290 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Government of Bengal (Ministry of Local Self-Government) propose to make and subject to which the Commissioners of the Krishnagar Municipality may allow communication-pipes to be laid down from the service-pipes of the Commissioners for the purpose of leading water to premises for domestic purposes only, are published for the information of persons likely to be affected thereby.

2. The draft rules will be taken into consideration on the 2nd January 1923, and any objection or suggestion which may be received by the undersigned through the District Magistrate before that date will be duly considered.

Draft rules.

So long as the Commissioners deem it practicable and consistent with the maintenance of an efficient water-supply, they may allow any owner or occupier of a holding paying a water-rate imposed under the provisions of Part VII of the Bengal Municipal Act, 1884, on the annual value of such holding, when such annual value is not less than Rs. 100, to lay down communication-pipes from the service-pipes of the Commissioners for the purpose of leading water to such holding for domestic purposes only, subject to the following rules and conditions :

Provided that no connection shall be allowed to holdings other than masonry buildings without the sanction of the Commissioners at a meeting :—

1. The owner or occupier of any holding requiring water to be laid on to such holding for domestic purposes, or requiring any addition or alteration to an existing water-supply, must apply for the same on a printed form to be supplied, free of cost, at the municipal office.

2. A fee of Rs. 100 must be paid to the Commissioners by such owner or occupier for each connection to a municipal main supply-pipe or a common communication-pipe laid in accordance with rule 3 before any work is commenced, such fee to be in addition to all other costs and charges imposed under these rules.

3. Except as provided below each holding must have a separate connection to the municipal main supply-pipe and extensions from the communication-pipe of one holding to another holding shall not be permitted :

Provided that with the consent of the Commissioners in meeting connections to two or more holdings may be permitted from a common communication-pipe. Any such communication-pipe must be laid in a street or common passage, and a stop-cock and meter as provided for in rule 7 must be fixed on the connection to each holding :

Provided also that no holding shall have more than one separate connection, but if in any case the Commissioners are satisfied that an adequate supply to any holding cannot be given through a single connection, they may sanction a second connection thereto.

4. The owner or occupier of the holding in respect of which the connection is required, must pay the entire cost of the connection, including the supply and fixing of the fittings referred to in rule 7, and must also pay the cost of such alterations in, or repairs to, roads, drains, sewers, gas or water-mains or pipes, and the cost of such other works as may be necessitated by, or result from, the work of making such connection.

5. The owner or occupier of the holding to which a connection has been given must, at any time, on receipt of notice to do so from the Commissioners, pay the entire cost of any repairs or alterations to the connection or any part thereof that the Commissioners may consider necessary to put it into a satisfactory condition or which may be necessitated by any change in the municipal water-works or system of distribution or

by the defective condition of the connection or any part thereof or by any other cause whatever.

6. (1) The works required under rules 4 and 5 may, at the option of the Commissioners, either be carried out by the Commissioners themselves at the expense of the owner or occupier of the holding in respect of which the works are required, or may be carried out by a person or firm employed by such owner or occupier and approved by the Commissioners.

(2) No work shall be carried out under sub-rule (1), except under the supervision of a municipal officer.

- (d) a meter;
- (e) service-pipes from the stop-cock to the taps; and
- (f) taps.

8. (1) All the fittings referred to in rule 7 shall be exact duplicates of standard samples kept in the office of the Commissioners, and approved by them in meeting.

(2) All fittings shall be inspected and tested and stamped by an officer of the municipality before being fixed.

(3) If any owner or occupier shall desire to adopt any fitting of a pattern different from the standard patterns, he must present such fitting for the approval of the Chairman, and any fittings so presented may, if considered satisfactory by the Chairman, be stamped, and samples thereof may be purchased and placed among the standard fittings.

9. The holding connection, when fitted in position, must be capable of standing a pressure of 40 feet, and no water shall be supplied until it has stood such a test applied by the Commissioners.

10. The size of the ferrule and the diameter of the communication-pipe referred to in clauses (a) and (b) of rule 7, and the number of taps shall be fixed in accordance with the annual valuation of the holdings as follows:—

11. (1) On every communication-pipe a brass or gun-metal stop-cock having the same water-way as such pipe shall be placed as near as practicable to the point where that pipe enters the holding to be supplied.

(2) The stop-cock shall be built in a brick chamber provided with a cast-iron surface cover-box so designed that it can be locked and the key of this box shall remain under the control of the Chairman.

(3) The stop-cock shall be capable of adjustment so that the supply to the holding may be regulated thereby.

12. (1) The meter shall be placed as near to the stop-cock as possible and in a position where it can be conveniently examined.

(2) The meter must be fixed in a brick chamber covered over with a cast-iron surface box of approved pattern.

- (c) if the owner or occupier of the holding touches or interferes with his meter in any way except with the permission of the Chairman, or wilfully injures or damages it ;

In the circumstances contemplated in clause (d) an officer authorized by the Commissioners in this behalf by a general order shall have the power to turn off the supply for a period not exceeding eight hours on his previously recording his reason in writing.

FINANCE DEPARTMENT.

No. 2717S.R.—*The 17th November 1922.*—In exercise of the power conferred by section 155 of the Sea Customs Act, 1878 (VIII of 1878), as amended by the Sea Customs (Amendment) Act, 1914 (XII of 1914), and in supersession of the rules published under Notification No. 748S.R., dated the 8th December 1910, at page 1741 of Part I of the *Calcutta Gazette* of the 14th December 1910, as subsequently amended, the Governor in Council is pleased to make the following rules for the Presidency of Bengal:—

Part I—Rules for denaturing spirit in the Custom House or in a licensed Warehouse.

1. The denaturing of imported spirit in the Custom House or in a licensed warehouse shall be conducted according to the following rules:—

(1) The ingredients to be used for denaturing spirit shall be "light caoutchoucine" and "pyridine bases" * added in the proportion of $\frac{1}{2}$ per cent. of each. The pyridine bases must be manufactured from mineral (coal-tar) and not animal sources. A guarantee as to the mineral source of the pyridine bases shall be furnished by the importer or the person desiring to denature the spirit. To every 99 gallons of plain spirit there shall be added half a gallon of light caoutchoucine and half a gallon of pyridine bases. The minimum strength of spirit to be denatured shall be 55° O. P.

* For the specifications and tests of "light caoutchoucine" and "pyridine bases", vide Government of Bengal, Finance Department, Notification No. 461S.R., dated the 11th March 1913, published in Part I, pages 39–93 of the *Calcutta Gazette* of the 12th idem.

(2) The ingredients mentioned in clause (1) shall be procured at his own expense by the importer or the person desiring to denature the spirit. Before admixture the ingredients shall be lodged at the Custom House or at some other suitable place to be approved by the Collector of Customs, who shall cause samples to be tested in order to satisfy himself that the ingredients are suitable for denaturing alcohol.

(3) When the mixture of the denaturants with the spirit is completed, the liquor shall be tested by drawing a sample of about half an ounce from each cask or drum, and adding to each sample separately three or four times the quantity of water. If the mixture becomes milky, the liquor shall ordinarily be admitted at the reduced rate of duty. In cases of dispute the decision of the Collector shall be final. In any case in which the Collector considers such a course necessary he may direct that samples of the liquid shall be examined and reported on.

Provided that—

(a) if the consignment contains casks or drums of not less than 50 gallons each, the person denaturing may demand that not less than one sample shall be sent from each such cask or drum; and

(b) if the consignment contains casks or drums of less than 50 gallons each, the person denaturing may, and shall, if so ordered by the Collector, before admixture of the denaturants pour the contents of two or more such casks or drums into one or more casks or drums of not less than 50 gallons capacity; and, when this is done, the spirit shall be treated, for the purpose of testing and for the levy of expenses under clauses (5) and (6), as if originally stored in such larger casks or drums.
